

# Label & Print 2018

## Press Release

### Phoseon Technology Exhibits UV LED Curing Solutions at Label & Print 2018

*Visit the Phoseon stand K10 to learn more about  
LED curing for packaging printing, labelling and converting*

Hillsboro, Oregon (January 29, 2018) - Phoseon will showcase the latest UV LED curing solutions for packaging printing, labelling and converting applications at the upcoming Label & Print 2018 event in Birmingham, UK. Visit the Phoseon exhibit, at stand K10, to learn how Phoseon LED technology is a perfect fit for these applications due to the compact size, ease of integration, and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials, including thin and heat-sensitive substrates, at maximum production speeds with low-input power.

Label & Print 2018 will take place on February 28-March 1 at the National Exhibition Centre in Birmingham, UK. It will showcase a wide variety of industry-related equipment for label, screen and inkjet printers, manufacturing machinery, drying and curing equipment associated with this sector. Label & Print 2018 will take place in conjunction with Packaging Innovations (Inc. Ecopack and Contract Pack) 2018 and Empack 2018.

#### About Phoseon Technology

In 2002, Phoseon Technology pioneered the use of LED technology for UV curing applications, and has recently expanded into Life Sciences. As the world leader in providing UV LED solutions, Phoseon engineers patented LED technology to deliver rugged, high-performance products for application specific needs. The company is focused 100% on LED technology and provides worldwide sales and support capabilities.
