

Press Release

Phoseon Technology Partners with The Mäder Group and Université Haute Alsace to Demonstrate UV LED Curing Solutions at JEC World 2018

Visit stand E27 to learn more about LED curing for coating and adhesive applications

Hillsboro, Oregon (February 6, 2018) - Phoseon Technology will partner with The Mäder Group and Université Haute Alsace to demonstrate the latest UV LED curing solutions for composite coating applications at the upcoming JEC World 2018 event in Paris, France. Visit their exhibit, Pavilion 5/Stand E27, to learn how Phoseon LED technology is a perfect fit for these applications due to the compact size, ease of integration, and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials, including thin and heat-sensitive substrates, at maximum production speeds with low-input power.

“We will be demonstrating how coatings can be cured on curved surfaces using UV LED lamps attached to robotic arms,” says Jean-Philippe Amevet, Phoseon Sales Manager.

JEC World 2018 will take place at the Parc des expositions, Paris-Nord Villepinte on March 6-March 8 in Paris, France. The exposition will concentrate on the manufacturing equipment, materials and drying and curing equipment for the composite industry.

About Phoseon Technology

In 2002, Phoseon Technology pioneered the use of LED technology for UV curing applications, and has recently expanded into Life Sciences. As the world leader in providing UV LED solutions, Phoseon engineers patented LED technology to deliver rugged, high-performance products for application specific needs. The company is focused 100% on LED technology and provides worldwide sales and support capabilities.
