Press Release

Phoseon Technology Exhibits LED Curing Solutions at FPD China 2018

*Visit the Phoseon booth E7-7146 to learn more about UV LED curing
for display and touch screen applications*

Hillsboro, Oregon (February 14, 2018) - Phoseon will showcase the latest UV LED solutions for display and touch screen curing applications at the upcoming FPD China 2018 event in Shanghai, China. Visit the Phoseon exhibit, E7-7146, to learn how Phoseon LED technology is a perfect fit for adhesive and coatings applications due to the compact size, ease of integration, and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials, including thin and heat-sensitive substrates, at maximum production speeds with low-input power.

FPD China 2018 will take place at the Shanghai New International Expo Centre on March 14-16 in Shanghai, China. Along with the latest technology, the exposition will focus on the manufacturing equipment, materials and drying and curing equipment for the display and touch screen sector.

About Phoseon Technology

In 2002, Phoseon Technology pioneered the use of LED technology for UV curing applications, and has recently expanded into Life Sciences. As the world leader in providing UV LED solutions, Phoseon engineers patented LED technology to deliver rugged, high-performance products for application specific needs. The company is focused 100% on LED technology and provides worldwide sales and support capabilities.
