

The InkJet Conference USA 2018

Press Release

Phoseon Technology Exhibits LED Curing Solutions at The InkJet Conference USA 2018

Visit booth D9 to learn more about LED curing for printing applications

Hillsboro, Oregon (March 12, 2018) - Phoseon will showcase the latest UV LED curing solutions for printing applications at the upcoming The InkJet Conference USA (TheIJC USA) 2018 event in Chicago, IL. Visit the Phoseon exhibit, booth D9, to learn how Phoseon LED technology is a perfect fit for printing applications due to the compact size, ease of integration, and high intensity output

Phoseon FireJet™ FJ100
Air-cooled Light Source

achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials, including thin and heat-sensitive substrates, at maximum production speeds with low-input power.

TheIJC USA 2018 will take place April 12-13 at the Westin O'Hare in Chicago, IL. It will showcase a wide variety of industry-related equipment for inkjet printers, manufacturing machinery, drying and curing equipment associated with this sector.

About Phoseon Technology

Since 2002, Phoseon Technology pioneered the use of LED technology for Life Sciences and Industrial Curing. Through our relentless innovation, we deliver high performance, reliable and patented LED

based solutions. Our strong focus on customer collaboration has resulted in world-wide market leadership position and presence. Phoseon is an ISO9001 certified company manufacturing award winning products. We uniquely focus 100% on LED technology therefore ensuring superior reliability, business economics, and environmental benefits.
