

Touch Taiwan 2018

Press Release

Phoseon Technology Exhibits LED Curing Solutions at Touch Taiwan 2018

Visit the Phoseon booth M1101 to learn more about LED curing for adhesive applications

Hillsboro, Oregon (August 3, 2018) - Phoseon will showcase the latest UV LED curing solutions for adhesive applications at the upcoming Touch Taiwan 2018 event in Taipei, Taiwan. Visit the Phoseon exhibit, M1101, to learn how Phoseon LED technology is a perfect fit for adhesive applications due to the compact size, ease of integration, and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials, including heat-sensitive substrates, at maximum production speeds with low-input power.

UV LED curing solutions are being rapidly adopted for curing adhesives and for bonding applications in factory assembly lines throughout the world. Low operating costs, long lifetime, and low maintenance are just a few of the reasons.

UV LED adhesive curing applications include: electronics, medical, industrial and many others.

Touch Taiwan 2018 will take place at the Taipei Nangang Exhibition Hall 4F on 29-31 August in Taipei, Taiwan. It will showcase a wide variety of industry-related equipment for touch panel and optical film, manufacturing machinery, drying and curing equipment associated with this sector. New technologies related to OLED applications, including sapphire processing, ceramic materials and 3D curved glass will also be demonstrated.

About Phoseon Technology

Since 2002, Phoseon Technology pioneered the use of LED technology for Life Sciences and Industrial Curing. Through our relentless innovation, we deliver high performance, reliable and patented LED based solutions. Our strong focus on customer collaboration has resulted in world-wide market leadership position and presence. Phoseon is an ISO9001 certified company manufacturing award winning products. We uniquely focus 100% on LED technology therefore ensuring superior reliability, business economics, and environmental benefits.
