

Bring this flexo press to life and see how you can CONVERT MORE

Phoseon UV LED Curing Solutions
Now with financing options for flexographic printers

Augmented Reality apps are supported on select devices. Performance may vary.

Retrofit your flexographic press with Phoseon UV LEDs and you'll see more uptime, throughput, reliability, choice in substrate materials and energy efficiency. And our new financing options make the value even more accessible.

Augmented reality apps run on select late-generation Android and iOS devices. See Phoseon AR Retrofit Experience in the Android App Store and Apple App Store for details.

Get the app, see the light

See how simple it can be to retrofit your flexographic press. Download the Phoseon AR Retrofit Experience app and watch the process unfold in your own office or production floor. Then learn how you can convert more at retrofit.phoseon.com.

Experience it at LABELEXPO 2018

Retrofit this flexo press in full virtual reality by visiting our booth #940 at LABELEXPO 2018 in Chicago.

25 - 27 September • Chicago
