

# FireJet™ FJ801 Area Curing Solution

## Press Release

### With new FJ801 systems, Phoseon Boosts Power of FireJet™ 800 Series up to 50%

#### *UV LED systems for the electronics manufacturing adhesives curing*

Hillsboro, Oregon (December 2, 2019) - Phoseon Technology, the leader in UV LED curing solutions, today announced the launch of the FireJet™ FJ801 area curing solution, targeting electronics manufacturing adhesives cure applications and lab material/substrate curing. The new air-cooled solution provides increased power of up to 50% over its predecessor, the J800.

The new FJ801 light source is designed primarily for production lines which requires area curing such as micro speakers and camera modules manufacturing. Starting from a base curing area of 100mm x 100mm, these modular products can scale in three directions, to provide contiguous, uniform UV output. The FJ801 is available in 365nm/385nm/395nm/405nm wavelengths. The FJ801 light source offers process stability with Phoseon's patented TargetCure™ technology that provides users with precise and predictable UV output.

FireJet FJ801 Light Source & Controller

The FJ801 light source comes with a separate controller that uses a simple, intuitive graphical interface, controlling up to two lamps. The controller display now includes the accumulated time that the UV lamp has been ON, as well as lamp temperature.

"The FJ801 light source has the same excellent uniformity and reliability with FJ800 light source. A higher irradiance provides a faster cure, which improves productivity. In addition, the scalability of the FJ801 provides an ideal solution for large area curing." Stated Rui Zhou, Technical Marketing Engineer. "The FJ801 controller is priced lower than the FJ800 controller but displays more important lamp information to ensure process safety. The controller is backward compatible FJ800 lamp too."

#### About Phoseon Technology

Since 2002, Phoseon Technology pioneered the use of LED technology for Life Sciences and Industrial Curing. Through our relentless innovation, we deliver high performance, reliable and patented LED based solutions. Our strong focus on customer collaboration has resulted in world-wide market leadership position and presence. Phoseon is an ISO9001 certified company manufacturing award winning products that are covered by more than 300 patents worldwide. We uniquely focus 100% on LED technology therefore ensuring superior reliability, business economics, and environmental benefits.
