# Phoseon Technology Named Finalist for Environmental and Sustainability at the Label Industry Global Awards

*UV LED Curing Offers Environmentally Sustainable Process for Printers and Converters*

Hillsboro, Oregon (August 12, 2020) - Phoseon Technology was named finalist for Environmental and Sustainability at the Label Industry Global Awards for its UV LED Curing Technology. This award is for a specific sustainable product or process introduced by a converter or supplier company in the label industry. Phoseon Technology has been the pioneer and leader of LED curing for over 18 years.

Judges will be looking for a company that has introduced a specific product or process and maintained the most sustainable and environmentally acceptable working practices into their purchasing and manufacturing operations and can demonstrate key materials, production and performance or consumer benefits.

The environmental benefits of UV LED curing are numerous and significant. Phoseon customers have experienced energy savings of between 75 and 85 percent with the implementation of UV LED curing systems. With traditional UV curing processes, the tremendous heat associated with mercury UV lamps required a lot of electricity to operate. The mercury lamps produce ozone which is dangerous to breathe, especially in a constricted space like a print shop. Air exhaust systems are required to extract the toxic fumes from the presses. These exhaust systems can be eliminated with UV LED curing making it a far more environmentally friendly process.

The Label Industry Global Awards celebrate innovation and excellence. They are the label and package printing industry's highest accolades. There will be a special video announcement on September 15 where the winners will be revealed.

### About Phoseon Technology

Since 2002, Phoseon Technology pioneered the use of LED technology for Life Sciences and Industrial Curing. Through our relentless innovation, we deliver high performance, reliable and patented LED based solutions. Our strong focus on customer collaboration has resulted in world-wide market leadership position and presence. Phoseon is an ISO9001 certified company manufacturing award winning products that are covered by more than 300 patents worldwide. We uniquely focus 100% on LED technology therefore ensuring superior reliability, business economics, and environmental benefits.
