

Converters Expo 2021

Press Release

Phoseon Technology Exhibits UV LED Curing Solutions at the Converters Expo 2021

Visit Phoseon, booth #103, to learn more about curing for converter applications

Hillsboro, Oregon (August 2, 2021) - Phoseon will showcase the latest UV LED curing solutions for printing applications at the upcoming Converters Expo 2021 event in Green Bay, WI. Visit the Phoseon exhibit at booth #103 to learn how Phoseon LED technology is a perfect fit for converter applications due to the compact size, ease of integration, and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials, including thin and heat-sensitive substrates, at maximum production speeds with low-input power.

“UV LED curing technology opens the door to new revenue opportunities with the ability to print on heat-sensitive and thinner substrates, offering increased profitability for printers and converters,” states Mike Higgins, Director of Sales, Americas.

Converters Expo 2021 will take place August 9-10 at Lambeau Field in Green Bay, WI. Converters Expo connects manufacturers of paper, film, plastics and nonwovens with industry buyers, specialists and suppliers.

About Phoseon Technology

In 2002, Phoseon Technology pioneered the use of LED technology for UV curing applications, and has recently expanded into Life Sciences. As the world leader in providing UV LED solutions, Phoseon engineers patented LED technology to deliver rugged, high-performance products for application specific needs. The company is focused 100% on LED technology and provides worldwide sales and support capabilities.
